

Thanks to their disinfectant, antiseptic and antimicrobial properties, the essential oils present in the **PURIFY CAPSULES** favor environmental sanitation.

The synergy with propolis performs an even more effective action, enhancing its known antiviral properties.

The combination of essential oils contained in the blend counteracts the proliferation of pathogens. It is recommended to use it in periods of greatest risk of diseases caused by environmental factors.

INGREDIENTS

Italian propolis * (80%) and essential oils * of Tea Tree, Thyme and Lemon (20%). * from organic farming.

PROPOLIS

Propolis is a completely natural and extremely healthy product for our body. It offers countless healing properties thanks to its powerful action against pathogens. The action of propolis is similar to that of a broad-spectrum antibiotic. Its effects include the inhibition of the motility of bacteria, a bacteriostatic effect and a bactericidal action. The propolis used by KONTAK is Italian, organic, of the highest quality. Its purity can be glimpsed thanks to the transparency of the glass of the capsules : certified, complete and controlled propolis.

TEA TREE ESSENTIAL OIL

Tea Tree essential oil is very aromatic, with effective disinfectant, antifungal and antiviral properties. In fact, it has an antiseptic action, and in aromatherapy, it is used for its very powerful antibiotic property with a very broad spectrum on bacteria, viruses and microbes.

RED THYME ESSENTIAL OIL

Thyme essential oil has a powerful antiseptic and bactericidal action carried out by phenols, in particular by the thymol substance capable of counteracting attack by pathogens. It is particularly indicated in the treatment of respiratory system disorders. Thyme essential oil purifies the air, harmonizes and balances the nervous system.

LEMON ESSENTIAL OIL

Lemon essential oil has recognized antiseptic and purifying properties and, spread in the environment, purifies the air by decreasing its bacterial load, thanks to its bactericidal power. It benefits the respiratory system by improving breathing and increasing the feeling of well-being. Valuable help for study and work as it promotes concentration.
